

# Frangipani Absolute India

*Plumeria alba L.*

**Floral**  
Spicy

Botanical family : Apocynaceae  
Method of culture : Traditional  
Part harvested : Flowers

INCI : Plumeria alba flower extract

## Specifications

Method for obtaining : Extraction of the concrete with ethanol  
:  
Appearance : Yellow to orange-light brown viscous liquid to pasty mass  
Constituents : Benzyl salicylate, Nerolidol, geranyl benzoate

## Harvest period

Frangipani is a tree that measures between five and 10 meters in height, with lovely, white, spiraled flowers with large petals tinged with yellow at their base. Native to the West Indies, today frangipani is found in every tropical region of the planet. It belongs to the same botanical family as oleander and periwinkle. The master glover-perfumer Frangipani became famous in the 16th century when he created almond-scented gloves. Later, when frangipani was discovered, its fragrance was reminiscent of the famous Frangipani gloves, and the plant was named in honor of the Italian master. Frangipani flowers give off a strong, floral smell of white flowers on a subtle base of balsamic notes of almond and vanilla. In perfumery, frangipani's olfactory nuances are challenging to preserve without altering them. As with rose and jasmine, frangipani absolute is obtained by extraction with a volatile solvent, hexane, which produces the concrete. This substance is then washed with alcohol before being concentrated into the absolute.

In Thailand, as is traditional in Buddhist ceremonies, frangipani flowers are used to make garlands and are then offered to the king and royal family. Frangipani is rarely planted near homes in Asia because, according to popular belief, it would be inhabited by ghosts as a shelter. In the Far East, frangipani trees are often planted near cemeteries and temples. The flowers' perfume is much stronger in the morning and at dusk, sweetly scenting their surroundings. Cutting into the bark of the frangipani causes toxic white latex to flow.

Advised uses : Perfumery, Cosmetic
